

## Wytech Coronavirus Update – 3/21/2020

Dear Customers and Suppliers,

As part of NJ Governor Murphy’s Executive Order #107, Wytech qualifies under the “essential services” category as a manufacturer of critical components to the medical device industry.

Wytech’s operations will fully continue while maintaining social distancing, vigorous cleaning, and encouraging employees to stay home if they have symptoms or have been in contact with anyone who has tested positive for Covid – 19. Those who can work from home are doing so now.

We would appreciate feedback from each of you as it relates to your ongoing operations, any changes in deliveries, production scheduling, inventory builds, or any other significant changes that might impact Wytech so we can plan.

We will continue to provide updates as needed.

Thank you and be well,

Mike
